PROFILE

Enthusiastic and diligent Computer Science graduate with a Bachelor's degree from GH Raison College Of Engineering And Management, Pune. Strong analytical, problem-solving, and communication skills demonstrated through academic projects and internship experience. Proactive learner committed to continuous improvement, aiming to leverage technical skills in Java development and software engineering to contribute effectively in a professional environment.

EDUCATION

CDAC – Diploma in Advance Computing

CDAC BENGALURU

Feb 2024 – AUG 2024

Bachelor of Technology (B.Tech) - Computer Science Engineering

GH Raison College of Engineering and Management

June 2018 – June 2022

Pune, India

HSC - Science

Jankidevi Jr. and Sr. College

June 2017 – June 2018

Buldhana, India

COURSES

Java Full Stack

Fortune Cloud

August 2022 – February 2023

Pune, India

Skills Gained:

- Proficiency in Java, JDBC, JSP, HTML/CSS, JavaScript
- Object-Oriented Programming (OOP)
- Data Structures & Algorithms: LinkedList, Stack, Queue
- Searching Algorithms, Sorting Algorithms
- Software Development Life Cycle (SDLC)
- SQL and MongoDB Database Management
- Frameworks: Spring, Hibernate

- Tools & Technologies: Git
-

PROJECTS

Online Event Management System

September 2021 – January 2022

- Developed a web application using HTML, CSS, JavaScript, Java, and SQL.
- Implemented user registration/login and admin functionalities.
- Designed features for event selection, place selection, equipment selection, and cost calculation.
- Managed data persistence and user interaction through database integration.

May 2024 – August 2024

- Developed a full-stack blogging platform that enables users to create, manage, and share blog posts.
- The application features user authentication, blog categorization, tagging, and a commenting system. The front end was built using React.js, ensuring a dynamic and responsive user interface.
- Node.js with Express.js was utilized on the backend to handle API requests and server-side logic. SQL was used to design and manage the relational database, which stores user data, blog posts, and comments.
- The project focused on creating a seamless and user-friendly experience while maintaining data integrity and security.

INTERNSHIP

Software Developer Intern

June 2023 – December 2023

- Gained 6 months of experience as a web developer, focusing on JavaScript and React.js.
 - Developed a personal portfolio and multiple mini-projects deployed on GitHub.
 - Acquired practical knowledge in front-end and back-end development, enhancing skills in full-stack development.
-

SKILLS

- Java Development
- Front-end Development (HTML, CSS, JavaScript, React.js)
- Back-end Development (Spring, Hibernate)
- Database Management (SQL, MongoDB)
- Software Development Life Cycle (SDLC)
- Version Control (Git)
